DETAILED ACTION

Allowable Subject Matter

1. Claims 4-9, 13 and 19 are allowed over the Prior Art of record.
2. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of independent claim 4 is the inclusion of the limitations of a pressure sensor/transducer including a substrate with an opening; a flexible diaphragm held across the opening of the substrate and wherein at temperatures of 400, the pressure sensor has a gage/gauge factor of about 22. The Prior Art fails to disclose any type of pressure sensor/transducer of this configuration/type exhibiting a gage/gauge factor of about 22. It appears the employment of SMA (shape memory alloy) material (as recited in independent claim 13, with a heating element capable of heating a pressure sensing element to an application temperature, and thus overcoming Prior Art) is the reason/cause for such a gage/gauge factor value/range. As to claim 19, the primary reasons for allowance is the inclusion of the specific dimension limitations of particular elements of a pressure sensor/transducer, recited within the claim, as well as the operation of the pressure sensor/transducer at pressures exceeding 3000psi.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
